Summary

UI Developer with 5+ years of experience building scalable, secure web applications using React, Next.js, and Azure. Delivered production-ready features for clients like Corteva and Kroger, with a focus on TDD and DevOps practices.

Skills

Languages JavaScript, HTML, CSS, DSA, Latex
Frameworks: React.js, Next.js, Vite, React Query, Jest, React Testing Library, MUI, MSAL-React

Tools: Git, GitHub, GitLab, Docker, Azure, SonarQube, Rancher, Harness, Snyk
Others DSA, TDD, Adobe Analytics, Google Analytics

Experience

Thoughtworks(/tw)

Mar 2024 – Present

Senior UI Developer (FTE Consultant)

Client: Corteva Agriscience

- Developed a critical web application for Sales Support and Sales Representatives to manage stock from scratch.
- Single-handedly implemented authentication and authorization using MSAL-React and the Azure platform.
- Designed and developed a search page to retrieve relevant Sales Agencies, Business Partners, Operations, and Sellers.
- Built the My Supply feature to track seed inventory and other product records for individual users.
- Collaborated with cross-functional teams to optimize IT processes and improve efficiency.
- Followed Test-Driven Development (TDD) practices, utilizing Jest and React Testing Library.
- Integrated Sonar for application monitoring and enhanced user experience.
- Integrated Adobe Analytics to understand the user navigation and bad spots on the website.
- Actively participated in client meetings and took ownership of feature development.

Client: PF Gen AI PoC

- Led the development of a Next.js-based mobile-first responsive fitness tracking website.
- Implemented an AI-powered chatbot and various interactive content sections, including image scrolling, video rendering, and bullet points.

ZopSmart, Bangalore

Jan 2021 – Mar 2024

Software Engineer

Client: Kroger

- Developed a Next.js-based platform from scratch, enabling users to create cloud providers, clusters, namespaces, services, and manage permissions.
- Built and maintained a real-time log-level override tool, visualizing service dependencies as a network graph using React.js and D3.js.
- Utilized React Query for data fetching, caching, and synchronization, along with the Context API for global state management.
- Leveraged Docker, Harness, Rancher, and Kubernetes for service deployment and monitoring.
- Authored a Terraform script to automate service principal creation and modification in Azure.
- Integrated Google Analytics for user behavior tracking.
- Secured applications with Azure AD and Google login mechanisms.
- Conducted unit testing using Jest, Enzyme, and React Testing Library.
- Implemented Snyk and Sonar to ensure code security and quality.
- Developed GitHub Actions workflows for automated deployment.

Internal Project: Hiring Motion

- Designed and developed a React.js-based application to streamline and track hiring processes across multiple organizations.
- Successfully onboarded over 25,000 profiles in 1.5 years, significantly improving HR operations.
- Utilized Material UI along with React.js, JavaScript, React Query, React Scheduler, HTML, and CSS.
- Implemented secure authentication using Google login.

Education

Dhirubhai Ambani Institute of Information and Communication Technology (DA-IICT)
Bachelor of Technology in Information and Communication Technology(Hons. in ICT with minor in CS)
Minors: Computational Science

2017 - 2021

Gyanmanjari Vidhyapith(GM)
11-12th Science

2015 - 2017

Achievements

- Recognized as Quarterly Top Performer for consistently exceeding performance goals.
- Scored 100/100 in Mathematics in 12th grade.
- Achieved 96% in JEE Mains, scoring 170 marks and securing 94th rank in Gujarat ACPC.

Projects

Stock Market Analysis and Prediction

- Developed a comprehensive platform for stock market analysis, enabling users to view annual reports and create personal portfolios.
- Contributed to frontend development using React.js.

Portfolio Website - <https://dilip-valiya.vercel.app> (Jan 2022 – Present)

- Actively maintaining a personal portfolio website.
- Built using Next.js with the latest features.
- Continuously adding new pages and enhancements.
